

## L-Carnitine Plus

- Contains L-Carnitine, zinc and lycopene
- Manufactured using cutting-edge liquid fill hard capsule technology

### Why should it be taken?

L-Carnitine plays a crucial role in energy production by transporting fatty acids into the cellular mitochondria thereby increasing energy supply to the proliferating hair matrix

Zinc is an essential element that is key for maintaining healthy skin and hair

Lycopene is an effective oxygen scavenger (antioxidant)

### How does it work?

L-Carnitine plays a crucial role in lipid oxidation by mediating the translocation of long-chain fatty acids inside the mitochondria by forming a long chain acetylcarnitine ester. This action helps to provide energy to the energy-consuming anagen hair matrix.

Zinc is an essential micronutrient required for metabolism and gene transcription. Zinc is also suggested to possess antioxidant properties and has been associated with preventing UV damage. It has also been demonstrated to have antiandrogenic properties and may therefore be beneficial in skin and hair disorders such as acne, hirsutism, hair loss etc.

Lycopene is a powerful antioxidant which is believed to protect the skin from photo-damage and environmental pollutants as well as help preserve the skin's smoothness and texture.

### Supplement Facts

Each capsule contains  
L-Carnitine - 350.00 mg  
Zinc - 7.00 mg  
Lycopene - 5.00 mg

### Packaging

Available in bulk packaged in HDPE bottles (60 capsules per container) Can be packaged in blister packs on request

### What are our services?

- Product Design
- Formulation & Development
- Packaging Design
- Stability Studies
- Regulatory Assistance
- Commercial Manufacturing

### What can we help you with?

- Expansion of your product portfolio
- Unique concept-to-counter solutions
- Off-the-shelf and customised products

### Who are we?

Vantage Nutrition is one of the first companies globally to offer unique solutions to nutraceutical brand owners seeking to introduce new products that allow them to expand their product portfolios and drive business growth. Our concept-to-counter service is a one-of-a-kind offering that meticulously focuses on consumer needs.
